TRAFFIC ALERT

NEW STOP SIGN INSTALLED AT 67TH AVE NE & NE 181ST ST

New stop signs have been installed in the eastbound and westbound directions of the intersection of 67th Ave NE & NE 181st St making the intersection a 4-way stop.

An engineering study warranted the installation of an all-way stop in this location due to traffic volumes roughly doubling since 2012.

The following improvements were added to the intersection on Tuesday, June 10, 2014:

- Stop signs on the SW and NE corners of the intersection with neon flags attached.
- “Stop Sign Ahead” warning signs approaching the stop signs with neon flags attached.
- “Traffic Revision Ahead” signs approaching the stop signs with neon flags attached.
- Thermoplastic stop bar markings on the roadway.

Additional improvements were added to the intersection on Wednesday, June 11, 2014:

- Thermoplastic roadway markings with the text “Stop Ahead” approaching the intersection.

Additional improvements will be added to the intersection on Friday, June 13, 2014:

- Supplemental a-board stop signs with flashing beacons in each lane eastbound and westbound.

UPDATE, Monday 6/16/14:

Both the eastbound and westbound stop signs on NE 18st Street are scheduled to be moved closer to the travel lane on Tuesday, June 17. Red flashing lights will be installed on each of the two stop signs as well. Moving the westbound stop sign closer to the through lane will require closing the right turn lane at 67th Avenue into Kenmore Village. Westbound vehicles will still be able to turn right into Kenmore Village from the main travel lane.
