

NE 190TH STREET CURB RAMP PROJECT

Current Status – COMPLETED

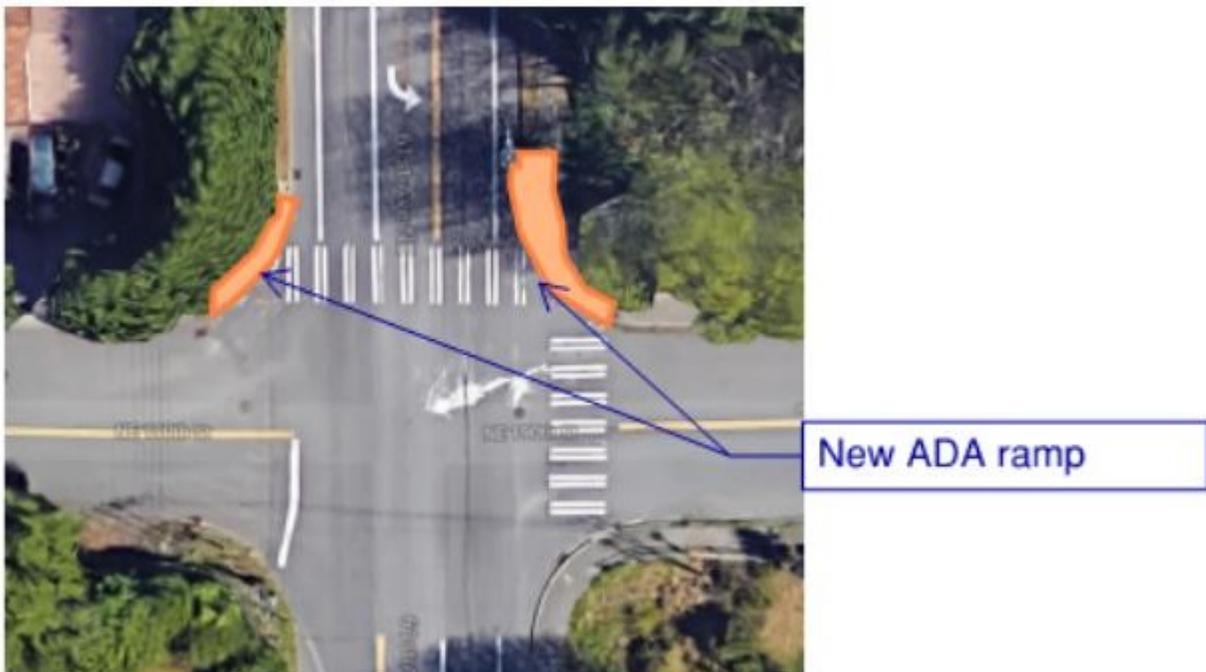

Project Description

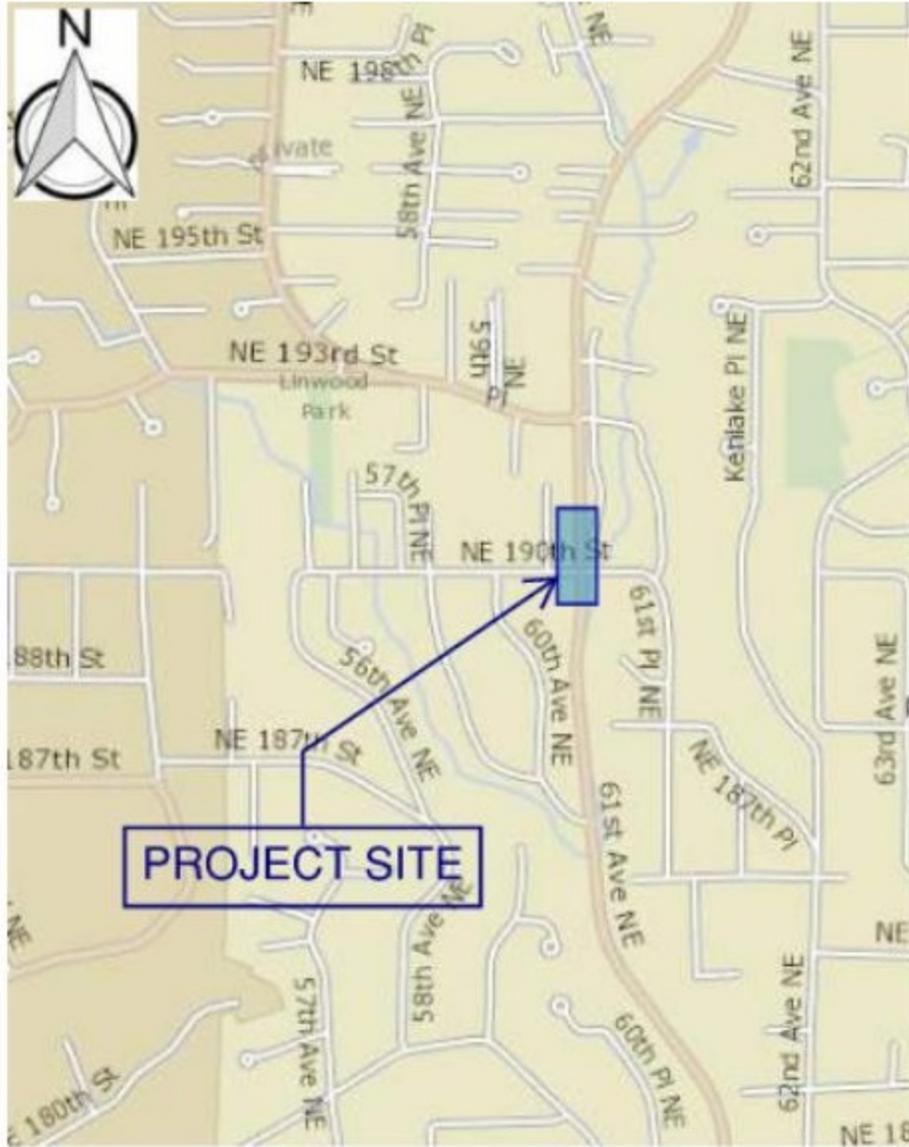

This project will install two new curb ramps that will meet the American Disabilities Act (ADA) guidelines. There will be saw cutting and jack hammering of concrete - this could be noisy. At times traffic will be impacted by reducing to one lane; this will cause some traffic delays.

Please be aware of construction workers.

Background

A request to improve wheel chair access at 61st & 190th was made. Other measures have been taken in the past, including pedestrian crossing signs and crossing flags.
