

2019 Crack Seal Project

Current Status - COMPLETED

The City of Kenmore crack sealed City roads as part of its Pavement Preservation Plan in 2019.

Information provided to residents follows: If your road is affected, temporary “No Parking” signs will be put out the day before work begins. When you see these signs, please remove your cars from the road so that work crews can complete their work quickly and effectively. Work will start each morning around 7am and continue until 6pm each day. Once the work crew has moved on, it’s completely safe to drive on the newly crack-sealed road – no additional curing time is required. Zone 2 on the map below has already been completed as of 5/28/19, and the schedule below has the approximate dates for the other locations. These dates are approximate, however, and may change depending on weather and how fast work is completed; the schedule will be updated periodically as the schedule changes. If you have any questions, please call Tobin Bennett-Gold at (425) 398-8900.
