

Ballot Measure RFP Questions

Does the city lead (as in be the face of) the public engagement or does the consulting team lead it under their own brand?

Most public engagement would be under the City's brand. Data collection would include both.

Is the consultant required to manage and pay for postage and expenses for mailings?

Not required. Respondents should be clear in their proposal if this is or is not included.

Do you have local facilities for hosting meetings / events, or do we need to identify and pay for site rentals?

The City does own meeting space (City Hall and the Hangar) that is available for free use for City business. If an alternate site is preferred by the respondent, that should be identified and included in the budget.
