

Kenmore is spreading the safety!

Starting November 2025, four new cameras will be added to the Kenmore Automated Photo Enforcement (KAPE) program.

Starting November 2025,

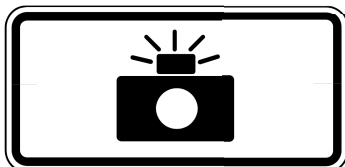

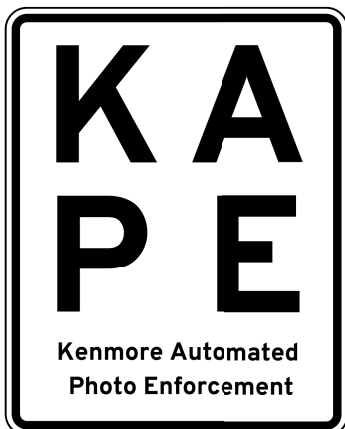

four new cameras will be added to the Kenmore Automated Photo Enforcement (KAPE) program to improve safety and reduce speeding in high-risk areas. Unlike the current fixed cameras, the new cameras are transportable, providing flexibility to place the cameras where they will have the greatest impact for the safety of drivers, cyclists, and pedestrians.

How will the cameras work?

The four transportable cameras will rotate locations approximately every 2 to 4 months based on speed data. When a camera is deployed to a location that has not previously had photo enforcement, there will be a one-time 60-day warning period prior to ticketed enforcement.

All locations where cameras may be deployed will have photo enforcement signing, and current camera locations and schedules will be available on the City's website.

Thanks for slowing your roll!

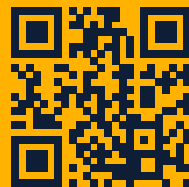

About KAPE

KAPE was initially launched in 2023 to include speed enforcement cameras in two school zones and one red light safety camera at the 61st Avenue & Bothell Way intersection. KAPE has been successful at changing driving behavior: nearly all drivers travel through KAPE areas at or below the speed limit, and pedestrian conflicts at the 61st Ave intersection have effectively been eliminated. KAPE gives drivers the tools they need to self-correct. Only about 1% of drivers end up receiving a ticket, and nearly 90% of tickets go to regional drivers and not Kenmore residents.

All revenue generated by the KAPE program is reinvested in traffic, pedestrian, and cyclist safety. Use of KAPE funds in 2023 and 2024 included \$250,000 for the 73rd Ave Sidewalks Project to support bicycle and pedestrian safety improvements and \$55,000 for school zone safety improvements such as additional school zone flashers and an additional speed feedback sign.
